

## Practix OK-10

- 63" (1600mm) or 84" (2100mm) belt width allows heat transfer printing of full width fabric
- 10" (250mm) diameter drum makes the Practix OK-10 the fastest small drum rotary transfer printing machine on the market
- Economically priced without using any inferior components
- Standard Practix Heavy Duty unitized frame construction
- Standard input loading table for transfer printing piece and banner goods
- Standard dual unwind/rewind system for transfer printing roll to roll. All units have pneumatic brakes and clutches for precise tensioning of fabric
