

Practix OK-275

GENERAL

Designed specifically for rewinding large rolls of fabric or foam, the OK-275 surface driven rewind is a heavy duty independent unit. With large 8 to 12 diameter drive rollers, rewinding even the largest of rolls is not a problem for this unit. Extremely simple in operation, the OK-275 has several options that allow the operator to wind the perfect roll. A variable speed motor in conjunction with a pneumatic slip clutch allow for the per amount of tension

on the web. Also available are heavy duty in line trimmers and slitters. Finally, electric or hydraulic edge guiding is available to ensure straight winding of your web.
