

PRACTIX OK-410

High Productivity Two Workstation Heavy Duty Cap Embossing/Thermoprinting Press

GENERAL

*Designed specifically for embossing/thermo-printing on caps, **OK-410** is uniquely suited for heavy duty embossing or printing on cotton caps or any other caps where high fusing pressure, up to 224 PSI, is a must for high product quality.*

Extremely simple operation, minimum physical effort, and high productivity are the result of hand operated heated head sliding and two workstations. One working surface is available for loading while the other is printing or embossing.

Consistent quality of work is assured by a precision electronic temperature controller and timer.

SPECIFICATIONS

- Platen dimensions 2.5" x 5"
- Fusing pressure 224 PSI
- Air line pressure 100 PSI
- Power requirement 120/240V
- Connected load 8/4 Amps
